For example, if you have a household size of 1 and your household income is \$15,000, you would be in Group B.

If you have a household size of 2 and your household income is \$24,000, you would be in Group C.

Step 4: Estimate Your Final Voucher Level On The Following Charts:

On the charts to the right find your household size at the top which is either Single for a household of 1 or Family for a household of more than 1. Then go down until the amount in the Countable Asset column is greater than your total assets (which is the Countable Asset amount in Step 3 number 5 above). Then read across to the top row titled Income Subsidy Group (B-E) which is the Income Subsidy Group you listed in Step 2. Then refer to numbers 1–5 to see your Final Voucher Level. If your Final Voucher Level is a 5, you are not eligible for a subsidy.

For example, if you have a household size of 1 (**Single**) whose household income would qualify for a B Income Subsidy Group and you had \$10,000 in assets you would have a Final Voucher Level of 1.
